

child's name:

- 1 Put the printed sheet on ground.
- 2 Barefoot and standing up, align the heel with the heel mark.
- 3 Make sure your child is standing with equal weight on both feet.
- 4 Look straight down to the longest toe and circle the size. If the foot is in-between two sizes, choose the greatest size.
- 5 Because feet are not often of the same size, measure the right and the left foot.
- 6 The size that is measured only gives an idea of the required shoe size. Size often fluctuates from one manufacturer to the other.

### Important :

Make sure the foot-measuring scale has been printed at 100%.

Place credit card here to make sure scale is correct
